

MIDINTI AKSHAY KUMAR

📍 Thogarpally, Sangareddy, Telangana, 502306 📞 +91 8919883303
✉ akshaykumarmidinti@gmail.com 🌐 LinkedIn 🐙 GitHub 📁 Portfolio

Objective

Computer Science and Data Science student with strong skills in programming, databases, and analytics. Experienced in building full-stack and data-driven applications through internships and projects. Passionate about developing secure, scalable systems and exploring new technologies.

Education

MLR Institute of Technology – B.Tech, Computer Science and Data Science (CGPA: 7.78)	2023–2026
Sri Sangameshwara Govt Polytechnic College – Diploma in Mechanical Engineering (CGPA: 9.04)	2020–2023
Zilla Parishad High School – SSC (Secondary School Certificate) (GPA: 10.00)	2019–2020

Experience

VaultofCodes – Java Programming Intern Aug–Sep 2025

- Gained hands-on experience in Core Java by developing console-based applications and mini projects.
- Applied Object-Oriented Programming principles in real-world scenarios.
- Worked with Java collections, exception handling, and file I/O to build efficient and reliable programs.
- Improved debugging, problem-solving, and clean coding practices while collaborating on project tasks.

Future Interns – Data Science and Analytics Intern | Link July–Aug 2025

- Performed data cleaning, transformation, and visualization using Power BI.
- Built interactive dashboards to monitor KPIs and generate actionable insights.
- Applied Python (Pandas, NumPy, Matplotlib) for exploratory data analysis.
- Strengthened client reporting and professional communication skills.

Projects

Image Classification Using Machine Learning | GitHub | Website 2024

- Built a convolutional neural network using MobileNetV2 achieving **92% accuracy** on the CIFAR-10 dataset (60,000 images across 10 classes).
- Trained and evaluated the model using TensorFlow/Keras across **50+ epochs**, tracking loss and accuracy metrics.
- Implemented transfer learning to reduce training time by approximately **40%**.
- Deployed the trained model using a Streamlit web application for real-time image prediction.

Real-time IoT Sensor Data Monitoring and Analytics | GitHub | Website 2025

- Developed a real-time analytics dashboard using React and TypeScript to visualize live IoT sensor data.
- Processed and displayed temperature, humidity, and pressure data with **<1 second latency**.
- Implemented stream processing logic to detect anomalies when sensor values deviated beyond **±10%** thresholds.
- Designed **5+ interactive charts** using Recharts for time-series analysis and sensor filtering.
- Optimized state management to handle **10,000+ data points per minute** without performance degradation.

Technical Skills

- **Programming:** Python, SQL, Java, HTML, CSS, R
- **Data Analysis & Visualization:** Power BI, Tableau, Pandas, Matplotlib
- **Tools:** Git, GitHub, Jupyter Notebook, Oracle, MySQL, Streamlit, Excel, VS Code, Anaconda
- **Soft Skills:** Problem Solving, Critical Thinking, Adaptability, Communication

Certifications

- **Cloud Computing Fundamentals – Google Cloud Skills Boost** Certificate
Fundamentals of cloud computing, Google Cloud services, virtualization, and scalable infrastructure concepts.
- **Core Java – Infosys Springboard** Certificate
Object-oriented programming, core Java syntax, exception handling, collections, and basic application development.
- **SQL (Basic) – HackerRank** Certificate
Writing efficient SQL queries using joins, filtering, aggregation, and relational database fundamentals.
- **Python for Data Science – IBM** Certificate
Data analysis using Python, Pandas, NumPy, exploratory data analysis, and data visualization basics.
- **Career Essentials in Data Analysis – Microsoft & LinkedIn** Certificate
End-to-end data analysis workflow, business problem solving, Excel and SQL fundamentals, and data storytelling.
